VETRIX LAYER

To facilitate in formulating own feed Vetrix offers 5% & 35% Concentrates of high quality integrates with digestible Amino Acids, Vitamin & Minerals with all the required feed additives.

MIXING RATIO

MIXING RATIO 5%

5% Layer Concentrate

	LAYER CONC.	MAIZE	DORB	STONE GRIT	SOYA	TOTAL
PHASE I	5	54	13	10	18	100
PHASE II	5	54	15	10	16	100
PHASE III	5	54	16	11	14	100

MIXING RATIO 35%

35% Layer Concentrate

	LAYER CONC.	MAIZE	DORB	STONE GRIT	TOTAL
PHASE I	35	50	8	7	100
PHASE II	35	50	7	8	100
PHASE III	35	47	10	8	100

Composition :- Concentrate comprises of a mixture of:

Vitamins , Trace Minerals, Phytase, Cocktail Enzyme, Probiotic, AGP, Antioxidant, Coccidiostat, Liver tonic.

A complete premix is usually a mixture of trace minerals, vitamins, feed additives and supplements blended in standard proportions along with suitable carriers, diluents. It ensures optimum availability of each micro-ingredients into the final feed.

BENEFITS

1. Hassles of purchasing different vitamins, minerals & feed additives are minimized.
2. Minimizes human error in feed production.
3. Considerable savings in total feed cost without affecting bird performance.
4. Improves the nutrient value of feed ingredients.
5. Allows for least cost feed formulation.
6. Minimize operation cost. (Low Production Cost).
7. Enhance average daily gain & better FCR.
8. Ensure homogeneity of micro-ingredients in final feed.
9. Convenience of usages.
10. Eliminates inventory buildup & simplifies micro-ingredient handling.
11. For better HDP & lower feed per egg.

“ABCA has successfully grown its yeast based feed additive business across Asia in the last few years. Now, we have combined the management of the business with AB Agri’s other Speciality Nutrition activities. We have very strong business in Premix and Nutrition Service (manufacture in UK and Vietnam), Piglet Starter Feed (Europe’s leading brand) and New Generation Proteins (high quality proteins with function properties). Long standing partnership in several Asian countries demonstrate the value of our immensely talented technical team. Together the business will deliver world leading expertise in animal nutrition, adding value to the food supply chain from farm input supplier to the consumer. Utilising the extensive R&D activity and technical support of AB Agri will help our Distributors and Customers to improve animal performance and allow them to differentiate their businesses to better compete”.

- Neil Geddes - Head of Asia
